

One Marine

Remote Assistant

Augmented Reality Smart Glasses,
an innovative solution for 2 way real time communication
Maritime & Enterprise Sectors

One Marine 'Remote Assistant' is a solution based on **smartphones, tablets** and **smart glasses** able to share information between field service operators and support departments. It can effectively assist users with difficult tasks, having real-time data at hand, keeping a close look at the remote situation. This increases productivity and customer satisfaction, resulting in decreased costs and increased revenue.

Application features

- 2 way voice communication
- Office expert screen sharing for avoiding confusion and time saving
- Video and image storing for later viewing/uploading to the cloud

Solution features

- Satellite link optimized
- Hardware Agnostic - 'Remote Assistant' can be utilised on smart devices (IOS & Android) and smart glasses
- Continual addition of features
- Software customization based on end-user requests
- Competitive pricing
- Integrated with other One Net Group solutions (Powerline IP, WiFi)
